BRIEF EXPLANATION OF RESULTS AND COMMENTARY ON RESULTS AND OTHER SIGNIFICANT INFORMATION

Orion has booked a \$5 million (gross) income on the termination of the Orion Royalty¹ in relation to the Paulsens East Iron Ore Project.² Orion initially received \$2 million in January 2024³, with an additional \$3 million deferred until 30 June 2024, which was received on 4 July 2024.⁴

Orion's \$0.67 million expenses for the year is principally attributable to its:

- \$0.20 million unrealised net loss in its investment in Strike Resources Limited (ASX:SRK), which declined in price from 6 to 4 cents per share during the year; and
- \$0.39 million Personnel expenses, which includes \$0.275 million in back-pay to Directors (for the financial years ended 30 June 2022 and 2023), who had previously voluntarily agreed to suspend payment of their salaries/fees to assist the Company with management of its cash position.

Results for Announcement to the Market

Orion notes that it accounts for Bentley Capital Limited (ASX:BEL) as an Associate entity, which means that Orion is required to recognise a share of BEL's net gain or loss in respect of a financial period based on Orion's (26.95% as at 30 June 2024) shareholding interest in BEL (this is known as the equity method of accounting for an associate entity). As a result the Company's carrying value of its investment in BEL has been reduced from cost to nil – as a consequence of the Company's accumulated recognition of BEL's net losses. This compares with BEL's closing bid price on ASX of 2 cents per share as at 30 June 2024 (valuing Orion's investment at \$0.41m) and BEL's after-tax NTA value of 1.8 cents per share as at 30 June 2024 (valuing Orion's investment based on BEL's NTA backing at \$0.37m).

The Company is not required to carry the BEL investment at a negative value (ie. below Nil) and if BEL should generate net profits in the future, the Company will recognise a share of BEL's net profits under the equity method, which will permit the Company to recognise a positive carrying value for BEL.

Orion and BEL's financial performance is primarily dependent on the share price performance of Strike Resources Limited (ASX:SRK) (in which Orion has 10 million shares and Bentley has 56.7 million shares).

The SRK share price has traded within a range of 3.3 cents (on 15 February 2024) to 7.9 cents (on 13 July 2023) in the past 12 months, with a bid price of 4 cents (as at 30 June 2024) and a current price of 3 cents (as at 27 August 2024).

Further information about Bentley's operations financial position and performance for the financial year ended 30 June 2024 are outlined in Bentley's 30 June 2024 Full Year Report.

Please refer to the Directors' Report and Financial Report for further information on a review of Orion's operations and the financial position and performance of Orion for the financial year ended 30 June 2024.

Notwithstanding the accounting carrying value of the investments of the Company as outlined herein, it is noted that the market value of these share investments as at balance date are as follows:

(d) \$5 Million Income from Termination of Iron Ore Royalty Entitlement²⁰

As part of Strike's sale of its Paulsens East Iron Ore Project²¹, the buyer had requested the cancellation of the Orion Royalty² that was payable to CXM Pty Ltd (**CXM**) for iron ore produced from Paulsens East (with CXM being a wholly-owned subsidiary of Orion) and CXM had agreed to do so (under the sale agreement) on the following terms (at completion of the agreement):

Board Committees

During the financial year and as at the date of this Directors' Report, the Company did not have separate designated Audit or Remuneration Committees. In the opinion of the Directors, in view of the size of the Board and nature and scale of Orion's activities, matters typically dealt with by an Audit or Remuneration Committee are dealt with by the full Board.

REMUNERATION REPORT

This report details the nature and amount of remuneration for each Director and Company Executive (being a company secretary or senior manager) (**Key Management Personnel**) of Orion.

The information provided under headings (1) to (5) below has been audited for compliance with section 300A of the *Corporations Act 2001 (Cth)* as required under section 308(3C).

(1) Remuneration Policy

The Board determines the remuneration structure of all Key Management Personnel having regard to the Company's strategic objectives, scale and scope of operations and other relevant factors, including experience and qualifications, length of service, the duties and accountability of Key Management Personnel, the frequency of Board meetings, market practice (including available data concerning remuneration paid by other listed companies and in particular, companies of comparable size and nature) and the objective of maintaining a balanced Board which has appropriate expertise and experience, at a reasonable cost to the Company.

Corporate Governance Principles: The Company's Corporate Governance Statement (**CGS**) also addresses matters pertaining to the Board, Senior Management and Remuneration. The latest version of the CGS may be downloaded from the Company's website: www.orionequities.com.au/corporate-governance.

Fixed Cash Short-Term Employment Benefits: The Key Management Personnel of the Company are paid a fixed amount per annum plus applicable employer superannuation contributions. The Non-Executive Directors of the Company are paid a maximum aggregate base remuneration per annum inclusive of employer superannuation contributions where applicable, to be divided as the Board determines appropriate.

The Board has determined the following fixed cash remuneration for current Key Management Personnel during the year as follows:

Executive Directors

- (1) Mr Farooq Khan (Executive Chairman) - a base salary of \$220,369 per annum inclusive of employer superannuation contributions (which Mr Khan has voluntarily agreed to reduce to \$75,000 with effect from 1 July 2021); and
- (2) Mr Victor Ho (Executive Director and Company Secretary) - a base salary of \$105,013 per annum inclusive of employer superannuation contributions (which Mr Ho has voluntarily agreed to reduce to \$50,000 with effect from 1 July 2021).

Non – Executive Director

- (3) Mr Yaqoob Khan (Non-Executive Director) - a base fee of \$25,000 per annum.

Key Management Personnel can also opt to "salary sacrifice" their cash fees/salary and have them paid wholly or partly as further employer superannuation contributions or benefits exempt from fringe benefits tax.

Special Exertions and Reimbursements: Pursuant to the Company's Constitution, each Director is entitled to receive:

- (a) Payment for reimbursement of all travelling, hotel and other expenses reasonably incurred by a Director for the purpose of attending meetings of the Board or otherwise in and about the business of the Company; and
- (b) In respect of Non-Executive Directors, payment for the performance of extra services or the making of special exertions for the benefit of the Company (at the request of and with the concurrence of the Board).

Short-Term Benefits: The Company does not have any short-term incentive (**STI**) cash bonus schemes (or equivalent) in place for Key Management Personnel.

Long Term Benefits: The Company does not have any long-term incentive (**LTI**) cash bonus schemes (or equivalent) in place for Key Management Personnel.

REMUNERATION REPORT

Equity Based Benefits: The Company does not presently have any equity (shares or options) based remuneration arrangements for any personnel pursuant to any executive or employee share or option plan or otherwise.

Post-Employment Benefits: The Company does not presently provide retirement benefits to Key Management Personnel. Other than compulsory superannuation contribution and early termination benefits disclosed in 'Service Agreement' below, Key Management Personnel also have no right to termination payments save for payment of accrued unused annual and long service leave (where applicable) (these accrued employee entitlements are not applicable in respect of Non-Executive Directors). The Company notes that shareholder approval is required where a Company proposes to make a "termination payment" (for example, a payment in lieu of notice, a payment for a post-employment restraint and payments made as a result of the automatic or accelerated vesting of share based payments) in excess of one year's "base salary" (defined as the average base salary over the previous 3 years) to a director or any person who holds a managerial or executive office.

Service Agreements: The Company does not presently have formal service agreements or employment agreements with any Key Management Personnel.

Performance-Related Benefits and Financial Performance of Company: The Company does not presently provide short- or long-term incentive/performance-based benefits related to the Company's performance to Key Management Personnel, including payment of cash bonuses. The current remuneration of Key Management Personnel is fixed, is not dependent on the satisfaction of a performance condition and is unrelated to the Company's performance.

The Board does not believe that it is appropriate at this time to implement an equity-based benefit scheme or a performance related/variable component to Key Management Personnel remuneration or remuneration generally linked to the Company's performance but reserves the right to implement these remuneration measures if appropriate in the future (subject to prior shareholder approval where applicable).

In considering the Company's performance and its effects on shareholder wealth, Directors have had regard to the data set out below for the latest financial year and the previous four financial years.

4. SEGMENT INFORMATION (continued)

Accounting policy

The operating segments are reported in a manner consistent with the internal reporting provided to the "Chief Operating Decision Maker" (CODM). The Consolidated Entity's CODM is the Board of Directors who are responsible for allocating resources and assessing performance of the operating segments.

The Board has considered the business and geographical perspectives of the operating results and determined that the Consolidated Entity operates only within Australia, with the main segment being Investments. Corporate items are mainly comprised of corporate assets, office expenses and income tax assets and liabilities.

Description of segments

- (a) Investments comprise of equity investments of companies listed on the Australian Securities Exchange (ASX) and liquid financial assets; and
- (b) Corporate items are mainly comprised of corporate assets, office expenses and income tax assets and liabilities.

Liabilities

Liabilities are not reported to the CODM by segment. All liabilities are assessed at a consolidated entity level.

Unrecognised deferred tax asset - capital losses	341,540	341,540
	2,592,056	3,952,996

Critical accounting judgement and estimate

The above deferred tax assets have not been recognised in respect of the above items because it is not probable that future taxable profit will be available against which the Consolidated Entity can utilise the benefits. Revenue and capital tax losses are subject to relevant statutory tests.

The income tax expense includes a provision for income tax expense of \$1.5 million in respect of the total gross consideration received (\$2 million) and receivable (\$3 million (refer Note 11)) by CXM Pty Ltd on the termination of a royalty in relation to the Paulsens East Iron Ore Project. The Consolidated Entity will review this income tax position vis a vis the utilisation of available carried forward tax losses of \$12.6 million as part of the finalisation of its income tax return for the year ended 30 June 2024.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 30 June 2024

5. TAX (continued)

Tax Consolidation

The head entity, Orion Equities Limited and its controlled entities have formed a tax consolidated group with effect from 29 June 2004. The members of the tax consolidation group continue to account for their own current and deferred tax amounts. These tax amounts are measured as if each entity in the tax consolidated group continues to be a stand-alone taxpayer in its own right.

In addition to its own current and deferred tax amounts, the Company also recognises the current tax liabilities (or assets) and the deferred tax assets (as appropriate) arising from unused tax losses and unused tax credits assumed from controlled entities in the tax consolidated group.

Assets or liabilities arising under tax funding agreements within the tax consolidated entities are recognised as amounts receivable from or payable to other entities in the group. Any differences between the amounts assumed and amounts receivable or payable under the tax funding agreement are recognised as a contribution to (or distribution from) wholly-owned tax consolidated entities.

The income tax expense or revenue for the period is the tax payable on the current period's taxable income based on the notional income tax rate for each taxing jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements, and to unused tax losses (if applicable).

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to apply when the assets are recovered or liabilities are settled, based on those tax rates which are enacted or substantively enacted for each taxing jurisdiction. The relevant tax rates are applied to the cumulative amounts of deductible and taxable temporary differences to measure the deferred tax asset or liability. An exception is made for certain temporary differences arising from the initial recognition of an asset or a liability. No deferred tax asset or liability is recognised in relation to these temporary differences if they arose in a transaction, other than a business combination, that at the time of the transaction did not affect either accounting profit or taxable profit or loss.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses. The amount of deferred tax assets brought to account or which may be realised in the future, is based on the assumption that no adverse change will occur in income taxation legislation and the anticipation that the Consolidated Entity will derive sufficient future assessable income to enable the benefit to be realised and comply with the conditions of deductibility imposed by the law.

8. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

Listed securities at fair value	<u>400,000</u>	<u>600,000</u>
---------------------------------	----------------	----------------

Accounting policy

Financial instruments are initially measured at cost on trade date, which includes transaction costs, when the related contractual rights or obligations exist. Subsequent to initial recognition, financial assets at fair value through profit and loss acquired principally for the purpose of selling in the short term or if so designated by management and within the requirements of AASB 9: Financial Instruments will recognise its realised and unrealised gains and losses arising from changes in the fair value of these assets are included in Profit or Loss in the period in which they arise.

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available-for-sale securities) is based on quoted market prices at the balance sheet date which is the current bid price. The fair value of the unlisted managed funds is determined from unit price information provided by investment manager. The Consolidated Entity's investment portfolio is accounted for as "financial assets at fair value through profit and loss" and is carried at fair value.

9. FINANCIAL RISK MANAGEMENT

The Consolidated Entity's financial instruments consist of deposits with banks, accounts receivable and payable, investments in listed securities, and other unlisted securities. The principal activity of the Consolidated Entity is the management of its investments (Financial Assets at Fair Value through Profit and Loss) (refer Note 8). The Consolidated Entity's investments are subject to market (which includes interest rate and price risk), credit and liquidity risks.

The Board of Directors is responsible for the overall internal control framework (which includes risk management) but no cost-effective internal control system will preclude all errors and irregularities. The system is based, in part, on the appointment of suitably qualified management personnel. The effectiveness of the system is continually reviewed by management and at least annually by the Board.

9. FINANCIAL RISK MANAGEMENT (continued)

The financial receivables and payables of the Consolidated Entity in the table below are due or payable within 30 days. The financial investments are held for trading and are realised at the discretion of the Board of Directors.

The Consolidated Entity holds the following financial assets and liabilities:

	Note	2024 \$	2023 \$
Cash and cash equivalents	7	1,458,343	136,406
Financial assets at fair value through profit or loss	8	400,000	600,000

Payables	13	(241,359)	(106,328)
Net financial assets		1,616,984	630,078

(a) Market risk

Market risk is the risk that the fair value and/or future cash flows from a financial instrument will fluctuate as a result of changes in market factors. Market risk comprises of price risk from fluctuations in the fair value of equities and interest rate risk from fluctuations in market interest rates.

(i) Price risk

The Consolidated Entity is exposed to equity securities price risk. This arises from investments held by the Consolidated Entity and classified in the Statement of Financial Position at fair value through profit or loss. The Consolidated Entity is not exposed to commodity price risk, save where this has an indirect impact via market risk and equity securities price risk.

The value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments in the market. By its nature as an investment company, the Consolidated Entity will always be subject to market risk as it invests its capital in securities that are not risk free - the market price of these securities can and will fluctuate. The Consolidated Entity does not manage this risk through entering into derivative contracts, futures, options or swaps.

Equity price risk is minimised through ensuring that investment activities are undertaken in accordance with Board established mandate limits and investment strategies.

The Consolidated Entity has performed a sensitivity analysis on its exposure to market price risk at Balance Date. The analysis demonstrates the effect on the current year results and equity which could result from a change in these risks. The ASX All Ordinaries Accumulation Index was utilised as the benchmark for the unlisted and listed share investments which are financial assets available-for-sale or at fair value through profit or loss.

ASX All Ordinaries Accumulation Index	Impact on post-tax profit		Impact on other components of equity

9. FINANCIAL RISK MANAGEMENT (continued)

(a) Market Risk (continued)

(ii) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Consolidated Entity's exposure to market risk for changes in interest rates relate primarily to investments held in interest bearing instruments. The weighted average interest rate for the year for the table below is 4.19% (2023: 4.01%). The revenue exposure is immaterial in terms of the possible impact on profit or loss or total equity.

	2024	2023
	\$	\$
Cash at bank	1,458,343	136,406

(b) Credit risk

Credit risk refers to the risk that a counterparty under a financial instrument will default (in whole or in part) on its contractual obligations resulting in financial loss to the Consolidated Entity. Credit risk arises from cash and cash equivalents and deposits with banks and financial institutions, including outstanding receivables and committed transactions. Concentrations of credit risk are minimised primarily by undertaking appropriate due diligence on potential investments, carrying out all market transactions through approved brokers, settling non-market transactions with the involvement of suitably qualified legal and accounting personnel (both internal and external), and obtaining sufficient collateral or other security (where appropriate) as a means of mitigating the risk of financial loss from defaults. The Consolidated Entity's business activities do not necessitate the requirement for collateral as a means of mitigating the risk of financial loss from defaults.

The credit quality of the financial assets are neither past due nor impaired and can be assessed by reference to external credit ratings (if available with Standard & Poor's) or to historical information about counterparty default rates. The maximum exposure to credit risk at Balance Date is the carrying amount of the financial assets as summarised below:

	2024	2023
	\$	\$
Cash and Cash Equivalents		
AA-	1,458,193	136,406

The Consolidated Entity measures credit risk on a fair value basis. The carrying amount of financial assets recorded in the financial statements, net any provision for losses, represents the Consolidated Entity's maximum exposure to credit risk.

(c) Liquidity Risk

Liquidity risk is the risk that the Consolidated Entity will encounter difficulty in meeting obligations associated with financial liabilities. The Consolidated Entity has no borrowings. The Consolidated Entity's non-cash investments can be realised to meet trade and other payables arising in the normal course of business. The financial liabilities disclosed in the above table have a maturity obligation of not more than 30 days.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 30 June 2024

10. FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS

Fair Value Hierarchy

AASB 13 (Fair Value Measurement) requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- (i) Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- (ii) Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
- (iii) Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Financial assets at fair value through profit or loss:	Level 1	Level 2	Level 3	Total
	\$	\$	\$	\$
Listed securities at fair value				
2024	400,000	-	-	400,000
2023	600,000	-	-	600,000

There have been no transfers between the levels of the fair value hierarchy during the financial year.

(a) Valuation techniques

The fair value of the listed securities traded in active markets is based on closing bid prices at the end of the reporting period. These investments are included in Level 1.

The fair value of any assets that are not traded in an active market are determined using certain valuation techniques. The valuation techniques maximise the use of observable market data where it is available, or independent valuation and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2. If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

(b) Fair values of other financial assets and liabilities

		2024	2023

Current payables	13	(241,359)	(106,328)

The Directors are of the view that the property is not impaired as at balance date.

Property held for resale is valued at the lower of cost and net realisable value. Cost includes the cost of acquisition, development, borrowing costs and holding costs until completion of development. Finance costs and holding charges incurred after development are expensed. Profits are brought to account on the signing of an unconditional contract of sale.

17. CAPITAL RISK MANAGEMENT

Accounting policy

Subsidiaries are fully consolidated from the date on which control is transferred to the Consolidated Entity. They are de-consolidated from the date that control ceases.

All controlled entities have a June financial year-end. All inter-company balances and transactions between entities in the Consolidated Entity, including any unrealised profits or losses, have been eliminated on consolidation.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 30 June 2024

19. INVESTMENT IN CONTROLLED ENTITIES (continued)

Changes in Ownership Interests

When the Consolidated Entity ceases to have control, any retained interest in the entity is re-measured to its fair value with the change in carrying amount recognised in profit or loss. The fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Consolidated Entity has directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.
